

How to add your LTI follow-up calendar

A 2-minute guide to opening the calendar file (.ics) attached to your email — on your phone or on your desktop.

What you received: a single calendar file called something like *Firm_LTI_Follow_Up_2026-06-30.ics*. Opening it adds three short follow-up touchpoints — with talking points already written into each event — to your calendar. You only need to open it **once**.

On your phone

iPhone (iOS)

- 1 Open the email in **Mail** or **Outlook**.
- 2 Tap the **.ics** attachment.
- 3 Tap **Add All** (or **Add**) when the events preview appears.
- 4 Choose which calendar to add them to if asked, then tap **Done**.

Android

- 1 Open the email in **Gmail** or **Outlook**.
- 2 Tap the **.ics** attachment to download/open it.
- 3 Tap **Add / Save** when Google Calendar shows the events.
- 4 If it doesn't open automatically, open **Files** → tap the downloaded **.ics**.

On your desktop

Outlook (Windows / Mac)

- 1 Open the email and **double-click** the **.ics** attachment.
- 2 The events open in Outlook's calendar preview.
- 3 Click **Save & Close** (or **Add to Calendar**) for each, or **Save All**.

Google Calendar (browser)

- 1 **Download** the **.ics** from the email to your computer.
- 2 In Google Calendar, click the **gear** → **Settings**.
- 3 Choose **Import & export** → **Import**, select the file, click **Import**.

Reminders are built in. Each touchpoint already includes a 15-minute reminder, so your calendar will nudge you at the right time — no setup needed.

Troubleshooting

- Can't see the attachment on mobile? Open the same email on a desktop and add it there — it syncs back to your phone.
- Tapping the file just shows text? Use **Open in...** and choose your calendar app (or Outlook).
- Events landed in the wrong calendar? Delete them and re-open the **.ics**, choosing the calendar you want.
- Still stuck? Reply to the email that sent you this file and the Capital Learning team will help.
